

Supported Printer List for RDA Software

Dot Matrix Printers:

RDA Supports all Epson Dot Matrix printers.

(Other Dot Matrix printers that support Epson LQ emulation may work but are not officially supported)

Black & White Laser Printers:

RDA Supports most HP & Dell Laser printers

Most exceptions are listed below under Unsupported.

(All HP & Dell laser printers that support PCL5/6 and Postscript natively are supported)

Examples are the 2000, 4000, and 8000 series of printers

(Most laser printers from other manufacturers that support PCL5/6 and Postscript should work but are not officially supported)

Color LaserJet Printers:

RDA Supports most HP & Dell Color Laser printers

(All HP & Dell laser printers that support PCL5/6 and Postscript natively are supported)

Examples are HP's 2605, 3000, 3800, 4700, 5550 and 9500 models.

Examples of Dell's Color LaserJet Models are the 3110cn & 5110cn.

(Most laser printers from other manufacturers that support PCL5/6 and Postscript should work but are not officially supported)

Unsupported Printers:

Several printer models that are referred to as Host Based printers. These printers do not support industry standard printing languages such as PCL or Postscript. These printers are not supported by RDA Software and will not work at all. Some examples of these are listed below. This is not an exhaustive list. It is just a guideline.
